

Electronics & Circuits Bench — Further Reading

Verified external resources, organized by lesson. All links live at time of writing.

Lesson 1 — Ohm's law

READ Falstad CircuitJS — browser circuit simulator

<https://www.falstad.com/circuit/>

READ SparkFun — Voltage, Current, Resistance and Ohm's Law

<https://learn.sparkfun.com/tutorials/voltage-current-resistance-and-ohms-law>

Lesson 2 — The bench

READ SparkFun — How to Use a Multimeter

<https://learn.sparkfun.com/tutorials/how-to-use-a-multimeter>

READ Adafruit — Guide to Excellent Soldering (tool selection)

<https://learn.adafruit.com/adafruit-guide-excellent-soldering>

Lesson 3 — Soldering & flux

READ SparkFun — How to Solder: Through-Hole Soldering

<https://learn.sparkfun.com/tutorials/how-to-solder-through-hole-soldering>

WATCH Collin's Lab: Soldering — Adafruit Industries

<https://www.youtube.com/watch?v=QKbJxylERvg>

Lesson 4 — Debugging

READ Raspberry Pi GPIO pinout (40-pin header reference)

<https://pinout.xyz>

READ SparkFun — How to Use a Breadboard

<https://learn.sparkfun.com/tutorials/how-to-use-a-breadboard>

Simulator

TOOL Falstad CircuitJS — the tool used for every "predict, then simulate" exercise in this project

<https://www.falstad.com/circuit/>

Electronics & Circuits Bench · Chain K · niciahrymer-hillian — these same links are also live-clickable in the interactive tour's per-lesson "Continue learning" sections.
